

Public Notice Information

Harris County MUD 220

PWS ID 1013321

I got a Public Notice about the disinfectant residual treatment technique with my water bill. What does this mean?

Customers in the Audubon Subdivision receive their drinking water directly from the City of Houston. In this instance, the City of Houston did not provide water with a disinfectant residual that maintained high enough levels throughout the District.

Was the disinfectant residual level below the minimum requirement in my subdivision?

Yes. The Audubon Subdivision had a few disinfectant residual test results that were below the required minimum. It is noted that disinfection is active in the District. Water District Management performs additional flushing every month to ensure that the water has acceptable disinfectant residual test results. The District is working with the City of Houston to ensure that water delivered to the District has disinfection that meets the TCEQ requirements.

Are other samples taken?

Yes. Water District Management ensures that bacteriological samples are taken by the laboratory every month in both the Audubon Subdivision and Terrace Brook Subdivision. All sample results indicated that total coliform and E. coli were absent. You can find these test results on TCEQ's Drinking Water Watch website [here](#).

What if I still have questions?

Please contact our Compliance Manager, Sharon Salinas at (281) 376-8802.
