

Prestonwood Forest UD Sanitary Sewer Rehab Project Sections No. 2 & No. 4

Your District (Prestonwood Forest Utility District), will soon commence with a sanitary sewer rehabilitation project in Sections 2 & 4. The rehabilitation work will involve installation of liners, new piping and reconnecting individual service lines. In most cases, the work will require access to your back yard. Please observe appropriate notices (door hangers and yard signs) prior to and during the project. Special attention is directed to ceasing or limiting water usage during the notice period. Failure to do so may result in drains or toilets backing up into your home. Your cooperation during this project is greatly appreciated. For additional information, please refer to the District's website, www.prestonwoodforest.org.
